

AMENDMENT TO THE CLAIMS

Listing of Claims:

Claim 1 (Currently Amended): A mobile telephone, comprising:
a display which displays information including telephone numbers or characters;
a first data bus for connecting to control means and storage means that are provided as principal integrated circuits; and
a second bus for connecting said control means and said display means;
wherein said first bus and said second bus are independently connected to said control means,
wherein said first bus is not connected to said display means, and said second bus is not connected to said storage means; and
wherein said control means controls said first address data bus and said second bus independently.

Claim 2 (Previously Presented): A mobile telephone as claimed in claim 1, further comprising communication means for transmitting and receiving signals via a radio line,
wherein said control means is controlled to prohibit access to said second address data bus while said communication means is receiving signals.

Claim 3 (Previously Presented): A mobile telephone as claimed in claim 1, wherein said second bus is driven by lower voltage than said first address data bus.

Claim 4 (Cancelled).

Claim 5 (Previously Presented): A mobile telephone as claimed in claim 1, wherein said display means is arranged near an antenna of the mobile telephone.

Claim 6 (Cancelled):

Claim 7 (Currently Amended): A mobile telephone, comprising:

a display which displays information including telephone numbers or characters;

a first bus for connecting to control means and storage means that are provided as principal integrated circuits;

a second bus for connecting said control means and said display means;

wherein said first bus and said second bus are independently connected to said control means,

wherein the first bus is not connected to said display means, and said second bus is not connected to said storage means.

Claim 8 (Previously Presented): A mobile telephone as claimed in claim 7, wherein said control means controls said first bus and said second bus independently.

Claim 9 (Previously Presented): A mobile telephone as claimed in claim 7, further comprising communication means for transmitting and receiving signals via a radio line, wherein said control means is controlled to prohibit access to said second bus while said communication means is receiving signals.

Claim 10 (Previously Presented): A mobile telephone as claimed in claim 7, wherein said second bus is driven by lower voltage than said first bus.

Claim 11 (Previously Presented): A mobile telephone as claimed in claim 7, wherein said display means is arranged near an antenna of the mobile telephone.
